

# NUTRILINE

## LUTEIN ESTERS See Clearly

Lutein esters extracted from marigold flower petals are known to provide the following health benefits to everyone, specially the elderly. Lutein esters supplementation,

- Improves eye function, slows progression of AMD, guards against eye diseases such as cataract and glaucoma and adds to macular density.
- Reduces cancer risk especially cancer of the lung, skin, cervix, breast and colon.
- Is effective against atherosclerosis and reduces skin lesion risk.

Nutriline's lutein esters contain pure and concentrated lutein extracted by our patented SCFE extraction process. Packed with the powerful antioxidant lutein, Nutriline lutein esters reduce health risks in the elderly since lutein does not regenerate in the body and its intake is through dietary sources only.

### ***Our SCFE Facility – Patented extraction process for pure and concentrated product***

Nutriline lutein esters are produced at our 1000 tpa SCFE plant at Hyderabad. SCFE process is widely regarded as the best process for extraction since no organic solvents are used in the process. Our patented extraction process ensures pure and concentrated lutein esters just as they exist naturally in marigold flowers. Some benefits of the SCFE process are:

- SCFE is gentle on active ingredients.
- The extract is free of bacterial content and microbiological activities due to the extraction agent CO<sub>2</sub>.
- SCFE extracts lutein such that it remains intact and at its highest levels of concentration and purity.
- SCFE extracts can be easily assimilated by the human body.
